DETAILED ACTION

Page 2

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 11/8/04 was filed after the mailing date of the present application. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Election/Restrictions

- 3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a sense amplifier having first and second voltagedependent capacitors coupled to respective ones of the first and second input terminals of the sense amplifier, classified in class 365, subclass 205.
 - II. Claims 13-16, drawn to a method of operating a memory device having a sense amplifier, classified in class 365, subclass 207.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method in Invention II can be used to operate other memory device with different structure than that

Application/Control Number: 10/646,961 Page 3

Art Unit: 2824

claimed in Invention I; and vice versa, the sense amplifier circuit in Invention I can be used to amplifier signals from other circuits with different operating method than that claimed in Invention II.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

7. During a telephone conversation with Mr. Robert M. Meeks on 2/4/05 a provisional election was made without traverse to prosecute the invention of I, claim1-12. Affirmation of this election must be made by applicant in replying to this Office action. Claims 13-16 have been withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

8. The application has been amended as follows:

Cancel claims 13-16.

Allowable Subject Matter

- 9. Claims 1-12 are allowed.
- 10. The following is an examiner's statement of reasons for allowance:

The prior art of record fail to disclose a sense amplifier, in combination with other cited limitations, comprising first and second <u>voltage-dependent capacitors</u> coupled to respective ones of <u>the first and second input terminals</u> of the sense amplifier as recited in claims 1-6 and 7-12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

- 11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - a. Chi et al. (5,870,343) disclose a DRAM sensing sheme for eliminating bit-line coupling noise.
 - b. Chi et al. (5,917,748) disclose a multi-level DRAM sensing scheme.
 - c. Gillingham (5,612,912 discloses a method of multilevel DRAM sense and restore.
